Language Development with Engaging Children's Stories (El Desarrollo de Lenguaje con Cuentos Infantiles Divertidos)

A unique set of **12 children's books** written by a speech/language pathologist for English-speaking, Spanish-speaking, or bilingual children. The **engaging stories** teach important language skills for **social and academic success**, such as vocabulary building, describing, questioning, comparing, sequencing, classifying, summarizing, inferring, and predicting. They are written in **four progressive levels** that can be tailored for children based on their age and language level and that provide the built-in **scaffolding of instruction**.

The book series is optimal for children **ages 1-8** or whose language skills are at an infant/toddler level up to a 2nd/3rd grade level, and it can be used by **speech/language pathologists, special education teachers, regular education teachers, literacy specialists, ESL/ELL/ESOL teachers, and parents**.

The stories are also unique in that **multiple language targets** are combined and integrated into the text in a naturalistic way. In other words, the language targets are taught within a context of reasonable associations as opposed to being taught as isolated and unrelated chunks of information.
